

Bologna experience

The main activities of Tosca project included:

- Feasibility study to verify that all necessary pre-conditions for setting up a car sharing application were satisfied,
- The most suitable car parking locations were elected (3 the locations identified: P.zza VII Novembre, Via Zanolini, P.zza Roosevelt),
- Nine SMART cars available for the piloting, (this category has been chosen for its ecological motor, the low consumption and the reduced dimensions of the vehicle),
- Focused informative campaign in order to select potential car sharing users (3 categories were defined: students,

residents, and users from the small business sector),

- Installation of reservation system,
- Vehicle equipment installation (on board computer),
- Web sites development:

www.atc.bo.it/eup2001 (Restricted to the consortia members),

www.atc.bo.it/tosca (Public),

- Operators training.
