

setting up of a car sharing web site and the organisation of three workshops.

TOSCA will organise three car sharing workshops (with about 30-50 attendees each) where results of the car sharing demonstrations in Bremen and Bologna will be presented and the transferability of these examples to other European cities will be discussed. Dissemination activities will also include the production of a car sharing best practice study, the edition of a project brochure and the setting up of a car sharing best practice web page, hosted by ATC. All relevant project information will be published, project results will be updated regularly, and links to other car sharing trials, operators and technology suppliers will be maintained.
